

# 30 YEARS

## True Value Through Quality

**T**HE AX Group of Companies is celebrating its 30<sup>th</sup> anniversary as a very dynamic group deeply involved in three core sectors – the construction industry, the hospitality market as well as design and development of projects. The Group is able to combine all three aspects of its being by not only projecting and creating concepts ahead of their time but also to actually construct them with its in-house capabilities.

Today the AX Holdings Group is known beyond the shores of the little island of Malta and its reputation is not one that has come through idle hype but through hard work and endeavour to reach levels that are constantly breaking new ground.

The initial personal creativity and drive of the Group's chairman has made the Group a dynamic, diversified, forward looking organisation eager to meet new challenges and develop new opportunities. Angelo Xuereb lends his expertise to various other efforts and is active in all the Group's fields of operation. His input will obviously continue to bear fruit in all sectors although a certain restructuring is underway in the organisation.

This further augurs for increased Group growth which has not been linear by any means. It has built its reputation on its ability to combine its innate creativity with research and an awareness of the environment. As a result it has a string of projects to its credit that bear its stamp, a clear idea of the foresight and cutting edge entrepreneurship that the Group possesses. As a result of this philosophy, AX Holdings is constantly on the lookout for areas where it can grow and expand if the opportunity presents itself. This does not mean that the Group has an opportunistic philosophy. On the contrary, it has the ability to analyse its environment, identify opportunities and develop them from a mere concept to a real project.

Today, AX Holdings has developed into one of Malta's leading private companies giving a major and direct contribution to the national economy. The drive to move on and ahead stems from the philosophy that change generates progress and progress generates wealth. But it is primarily a thirst for achievement that is the driving force behind the AX Holdings' Group. And the more insurmountable the challenge, the stronger the determination.
